

Language & Brains!

Dr. Sam Epstein

Expirations in Minimalism

The latest from Dr. Epstein's growing corpse of work and part of his incredibly popular theme year "Zombies, Zombies, Zombies!", this talk focuses on Epstein's controversial "theory of the final state." Epstein seeks to fill a grave hole in mainstream theory which has for too long been consumed by the cognitive structures of the living "mind" while the tide of undead inquiry has shifted to consuming brains. This ground-breaking work will surely revivify scientific interest in necrological linguistic competence and UG (Undead Grammar).

date

4/1/09

location

**FOREST HILLS
CEMETERY**

time

12:00 AM

Beverages, refreshments and assorted weapons will be provided in a secure, heavily-fortified location immediately following the lecture (or possibly earlier). Loose-fitting clothing is strongly encouraged.
